Sustainable Space Division — Simplified.

TrendWall, a proven movable wall system engineered for sustainable environments.

For over 45 years, TrendWall has been used in floor-to-ceiling applications around the world. Its simple installation minimizes downtime and practically eliminates mess and waste. Plus, it can be rapidly reconfigured without demolition and using only a handful of trades. TrendWall responds with ease to support an organization's changing needs.

TrendWall by its nature is a sustainable solution, ensuring reduced resource consumption and less waste to landfill. It has received BIFMA **level® 1** furniture sustainability certification from NSF international. And with SCS Indoor Advantage® Certification on all components, TrendWall helps address indoor air quality while contributing points for LEED projects.

Tax Advantages

Be sure to investigate the tax codes in your area, too. TrendWall may save you bundles in taxes — movable walls are often classified as "tangible property" which can be depreciated over just 7 years, vs. drywall's 39 years. That's a big difference! See your tax consultant for details.

▲ TrendWall integrates beautifully into existing building interiors.

◀ A wide range of surface material and glazing options provide design flexibility.

Seamless Integration.

Effortlessly blend TrendWall into many building environments.

TrendWall offers flexible architectural planning, expanded capacity for utility and technical infrastructure, and integration with both existing building infrastructure and systems furniture. With a broad palette of standard surface materials and finishes, plus the ability to support a wide range of custom and special materials, TrendWall can seamlessly harmonize in any environment.

PANEL CHOICES

TrendWall power can be routed and accessed through vertical pilasters.

A 4" vinyl base is available in a variety of colors to match your interior.

Pilasters can easily accommodate your choice of lighting controls.

DOOR OPTIONS

Maximize Performance by Combining TrendWall with Our Raised Access Flooring.

Access power and data virtually anywhere within the system grid. Modular floor elements rise 2" above existing subfloor.

TrendWall® Flooring Solution makes reconfiguration easy, with power and data accessible from anywhere in the room — by removing a floor access panel. The low 2½" profile and non-metallic modular construction make it a practical and cost-effective cable management system, whether used in new construction, renovations or integrated into existing spaces.

Choose pre-wired, field-wired or PowerPac floor access.

From training spaces to conference rooms to open environments, our raised access flooring can save you time, money and headaches with every move and reconfiguration you require.
