

Does your document storage provider keep you in an ironclad cycle of mountain-high fees month after month? Break the cycle with a more affordable alternative!

**When it comes to healthcare, time is of the essence. Health care professionals need instant access to important information — especially in situations when quick decisions are crucial.**

But how can you deliver speedy and reliable health care when thousands of old paper records are still waiting to be scanned and moved into your EMR system?

**Southwest Solutions Group offers fast and affordable solutions.**

Your medical staff uses an EMR (electronic medical records) system. They scan and store new information with ease. But there's an elephant in the room that no one is talking about: the piles and piles of old paper records in your file room, waiting to be converted into digital format.

These old paper records are just as important as the current information in your EMR. You know they should be moved into the system. Time is being wasted, but you and your staff are too busy to finish the scanning work. If no drastic action is implemented, it could take years before all your records are finally digitized. In the long run, your medical organization could end up spending a lot more money than intended.

**The answer? Outsourcing.**

By engaging the services of Southwest Solutions Group, you and your staff can focus on what you do best: saving lives.

**Use EMR to Its Full Potential**

EMR technology is changing the healthcare industry, allowing doctors and nurses to work faster and more efficiently than ever—but is your hospital or healthcare facility really using it to its fullest potential? Does your team use it with ease and confidence? Have all your records been successfully transferred into your EMR system?

Southwest Solutions Group can address all these issues. Even before your medical office adopts an EMR system, we can already help you make the transition. While we scan your documents, your team can access digital copies of your records in an online encrypted environment that serves as a simulated EMR system. This ensures that by the time the EMR system is in full effect, you and your team are already familiar with the technology—in fact, it will seem like it's always been a part of your daily workflow.

**Free Up Space and Generate More Revenue**

Right now, your file room is filled with cabinets and boxes full of medical records. Can you imagine the possibilities if that space was used for something else? It could be a great spot for a new MRI machine, or you could simply use the extra space to treat more patients. By digitizing your documents and getting rid of your paper records, you can reclaim that space and use it for other revenue-generating functions.

We can store your documents at our off-site facilities for FREE while we scan them. We can also provide on-site document scanning at the same affordable price as our off-site services.

**What are the benefits of using Southwest Solutions Group?**

- ✓ You don't have to hire more people to do the work.
- ✓ You don't have to buy or maintain expensive scanners.
- ✓ You can finally free up precious space in your hospital or medical facility.

Use our scanning services for only as long as you need them — and according to an agreed-upon budget. We put YOU in control of your spending and put an end to needless financial bleeding.

**With all your paper records digitized, you can:**

- ✓ Easily migrate all of your records to your EMR system.
- ✓ Keep track of Meaningful Use reimbursements.
- ✓ Accelerate billing and collections.
- ✓ Simplify HIPAA (Health Insurance Portability and Accountability Act) compliance.
- ✓ Improve efficiency and accountability organization-wide.
- ✓ Free up space — convert file rooms into something more useful.

**Why Choose Southwest Solutions Group?**

Southwest Solutions Group has years of experience in providing the healthcare industry with state-of-the-art technology and exceptional service. Unlike other information management system providers, we offer great service without charging mountain-high fees.
