

# Security Storage Made Easy

Shown above is the LiftNStore® Overhead Security Cart, model LS-1007.

## Why does overhead storage make sense?

1. Small expensive electronics, jewelery and other pricey items are tempting targets for theft and it is important to keep them safe.
  2. You secure these things up front, are they safe in the back room too?
  3. You want these things to be easy to see and count for accurate inventory control.
  4. It is important to get these things out of storage and onto the sales floor quickly, safely and easily.
  5. You don't want to invest in exotic security systems.
  6. When the cart is overhead nothing can get dropped, crushed, impaled or damaged.
  7. Every month you are paying for open empty air space that could be used for optimal storage. Your overhead space suddenly becomes very valuable.
- The Security Cart itself is a welded steel cage that has locking doors with adjustable shelves and smooth rolling wheels.
  - All LiftNStore® Overhead Security Carts do the same thing, they go up and down. They are simple, reliable and strong.
  - Because the LiftNStore® Overhead Security Cart is an 'electric appliance' not a 'building improvement', you will enjoy a nice tax break
  - Every LiftNStore® Lift is made with pride in the United States of America.
  - Your satisfaction is guaranteed. With more than 3,300 successful installations over the last 20 years, LiftNStore® Overhead Lifts have become the gold standard and we stand behind our lifts.

## How does it work?

1. The overhead lift mounts into your ceiling so there is no need for a remodel. You don't even have to move your existing shelving.
2. Push the keyed button and the Security Cart comes right down to you.
3. Unlatch the cart and roll it onto the sales floor. Unlock the steel mesh doors for easy loading and unloading. You can also roll the cart to the delivery trucks for direct loading.
4. Roll back to the lift, lock the cage doors and reattach it to the lift.
5. Push the keyed button and up it goes.
6. When the lift is up you can relax knowing your inventory is safe and secure because no one can tamper with it. Your aisles stay open and clear.
