Harloff Products Are Used Throughout Hospitals in a Wide Range of Clinical Settings, Including:

1. Emergency crash carts to treat those who have suffered serious and life-threatening physical injury
2. Orthopedic casting-splinting carts for the treatment of strains, sprains and fractures
3. Anesthesia carts used in operating rooms and surgery centers
4. MR-Conditional carts tested for use in 3-Tesla MRI environments
5. Infection control carts and stations that reduce the risk of infection
6. Treatment and procedure carts used for everything from wound care to phlebotomy
7. Medication carts compatible with hospital medication distribution systems
8. Narcotics cabinets that allow medical staff to maintain physical security of controlled substances
9. Wood look carts and cabinets that are hospital grade and aesthetically appealing
10. Medical storage carts and cabinets to strengthen supply chain management

CLASSIC LINE PEDIATRIC RESUSCITATION CARTS
Standard Model, High Quality

FEATURES & BENEFITS

- Harloff addresses the special challenges of treating pediatric patients with a standard product featuring color-coded drawers for size specific equipment.
- Children vary in size, requiring different sizes of emergency supplies. Harloff’s pediatric emergency carts have nine drawers to store the multiple sizes of supplies to bridge this gap.
- After the child is measured, the right sized equipment is selected from the appropriate drawer.
- Each drawer features its own breakaway lock which ensures immediate access to critical supplies and easier restocking.
- Cart is designed to be compatible with popular pediatric color coding system. Includes painted drawer identifiers.

Specialty Package includes:
- IV pole
- Oxygen tank holder
- Drop shelf
- Four each, utility hooks
- Cardiac board

START CART
Reduce the Risk of Needle Sticks

FEATURES & BENEFITS
- Harloff’s Start Cart was designed in conjunction with Children’s Hospital, Boston to reduce the risk of needle sticks, while at the same time improving the efficiency of the IV or epidural procedure
- Clinicians no longer have to go back and forth to get supplies from a distant supply cart
- No longer use the patient’s bed, stretcher or surgical operating room table as a work surface or trash can
- No longer risk leaving exposed needles on the patient’s bed that may cause injury to the doctor, nurse, medical technician, or housekeeper
- Articulating arm allows clinician to work from sitting or standing position
- Two work surfaces
- Adjustable push handle in one inch increments
- Soft grip handles for moving cart from sitting position
- Three gallon sharps and waste containers make it easy to dispose of supplies
- 16 inch full extension drawer slides
- Keyless Drawer Retention Lock aka Toggle Latch (can be upgraded to key lock)
- Ballasted for stability and lower center of gravity
- Premium five inch casters make it easy to roll around the OR and patient rooms

Illustration of supplies used to start IV

Harloff's MR-Conditional Carts are built primarily of non-ferrous aluminum, plastic, and stainless steel for safe daily use in highly magnetic environments.

Now Harloff offers two cabinet sizes — Standard and Narrow Body. With packages for Anesthesia and Emergency requirements, multiple drawer configurations, and extra MR-Conditional accessories, Harloff is the right choice for storage, security and delivery needs in the Magnetic Resonance Imaging Suite.
**EMERGENCY MR-CONDITIONAL CARTS**

*Safe and Highly Efficient*

- Non-magnetic aluminum construction
- Contemporary design with rounded corners
- Specially sourced, low ferrous, ball-bearing full extension drawer slides
- Stainless steel breakaway locking system
- Full wrap-around vinyl bumper
- Five inch MR Conditional full swivel casters, one with brake, one directional
- Stainless steel pull-out side shelf on right side of cart
- Replaceable plastic top with integrated push handles
- Specific MR compatible accessories and drawer organizers shown at end of catalog
- Powder coat finish—17 colors available
- Pre-threaded holes for easy MR compatible accessory installation
- Cart addresses needs of hospitals and imaging centers that perform an increased variety of procedures in MRI suites
- Provides safe mobile storage of MR approved emergency supplies
- Cart is tested safe for use in both 1.5 and 3.0 Tesla magnetic resonance environments (reports are available upon request)
- Durable aluminum construction resists organic contamination, will not rust, and is easily cleaned
- Glossy white cabinet and MRI decal identifies cart as belonging in MRI suites

**Specialty Package includes:**
- IV pole
- Cardiac board
- Oxygen tank holder
- Two each, full drawer trays with adjustable dividers
- Four each, utility hooks

Our carts are clearly labeled with the MR CONDITIONAL icon, and include the required additional information as to what the conditionality of use is according to the terminology specified in the American Society for Testing and Materials (ASTM) International.

The MR CONDITIONAL label is used to alert the user that testing that was performed and the carts are safe for use in 1.5-Tesla and 3-Tesla systems.
Help prevent the spread of infections within the healthcare setting by using Harloff infection control carts and cabinets. Lower hospital costs by reducing the number of hospital acquired infections.
ISOLATION/PPE STATIONS

Personal Protection Organizers Preserve Floor Space

- Saves floor space, no more carts getting in the way of patient flow
- Allows storage of Personal Protective Equipment (PPE) in areas with space limitations
- Gowns – Holds more than 15 isolation gowns

- Gloves – Holds two or three 100 count boxes of examination gloves
- Other supplies – Can also hold shoe covers, bouffant caps, or face masks with splash guards
- Can be wall or door mounted. Door hanger included
- Durable light-weight aluminum construction, does not crack like plastic and is easier to clean
- Three standard designs with custom configurations also available
- Latex Free
- Silver ion antimicrobial paint available as an upgrade
- Supplies not included
- Quantity discounts available, sold by the dozen up to 36 units per pallet
- Powder coat finish – 17 colors available

Custom configurations and sizes available – contact Harloff for more details
ISOLATION STATION CARTS
Reduce the Risk of Pathogen Transmission

FEATURES & BENEFITS
- Isolation Station™ (patent pending) designed to counter the alarming rise in drug-resistant bacteria in hospitals.
- Makes following hygiene practices easier and less time consuming.
- Provides convenient access to supplies that assist infection control practitioners to follow their isolation protocols. As a result, the spread of infection decreases, hospitals avoid infection cases, and organization costs are reduced.
- Open well design eliminates searching in drawers and touching handles.
- Incorporates silver ion technology in the paint as an antimicrobial agent, which resists nosocomial pathogens when compared to current carts.
- Improves adherence to infection control and stops the spread of bacteria on contaminated hands and clothes by using a storage and supply system that makes it easier for healthcare workers to properly disinfect between patient visits.
- Two each, folding side shelves with quick-release latch (ISO6550)
- Well lid can be latched open
- Built-in glove box holder and mask box holder
- Area for hand sanitizer/soap dispenser
- Adjustable coat rack
- Powder coat paint finish
- Patent pending on design
- Ball-bearing, full extension drawer slides (ISO6550)
- Five inch full swivel casters, one with brake, one directional
- Cart is delivered fully assembled

Government rules and regulations require you to keep narcotics in secure locations. By storing drugs in narcotic cabinets, you can keep the potentially dangerous and addictive drugs out of the hands of individuals who may abuse them, while having them near at hand for the patients who would benefit from them. Harloff offers many different narcotic cabinets to help you keep both your controlled substances and your business secure.

More and more hospitals want the warmer appearance of wood for storage of medical equipment and supplies. This shift from institutional looking medical carts and cabinets to a wood-look will help improve treatment outcomes for the patient and overall satisfaction for the family.
MEDICATION FURNITURE

Improve Patient Satisfaction

The Patient Care Environment is changing and shifting to a de-institutionalized look. Harloff’s acute care furniture is built to satisfy functional and aesthetic criteria established in the new acute care environment. Our durable, appealing cart design is easily cleaned and maintained, with seamless surfaces resistant to moisture penetration, formation of harmful bacteria and deterioration from disinfectants.

NARROW CARTS & MEDICATION CABINETS

Hospital Grade, Aesthetically Appealing

Narrow Wood-Look Carts are designed to provide an efficient and aesthetically appealing storage solution in areas with limited space. Harloff’s wood-look carts are engineered to meet industry standards for security and clinical function, with a warm furniture appearance. Wood-Look carts feature:

- All aluminum internal structure
- MDF panels covered with a special heat-pressed thermal foil laminate with a rich wood appearance
- Proven locking system
- Internal narcotics box in medication carts
- Full size and narrow design options
- Pushable
- Skirting conceals four inch ball-bearing wheels
- Choice of laminate colors (Cherry Mahogany or Solara Oak)

Wood-Look Medication Cabinets add the look of wood to functional storage for an attractive medication cabinet storage solution. Intelligent engineering and design meets industry standards for security and function.

- Painted steel cabinets
- MDF panels covered with a special heat-pressed thermal foil laminate with a rich wood appearance
- One hand open and close slam-lock
- Predrilled holes for mounting
- Hardware included
- Choice of laminates
- Holds 40 punch cards and liquid storage

Create a lean environment throughout your hospital with Harloff’s Medical Storage line of carts and cabinets. These products are designed to strengthen your supply chain, increase work capacity and decrease operational costs. Harloff’s Medical Storage line helps clinical departments put the right amount of supplies where they are needed while protecting them from pilferage or grazing, thereby reducing over-buying, hoarding, and expiration of unused supplies.
CARTS FOR OR, SPD & MATERIALS MANAGEMENT

Double Cart Shell Configurations

**FEATURES & BENEFITS**

- Offers over 35% more tray storage capacity by volume when compared with leading competitor's product
- Further optimize space within trays with adjustable dividers that have unique positive locking design to withstand high loads without being forced out of position
- Unique design of the slide tracks on the side panels allows for trays to be extended and viewed at an angle without falling out of the cart
- The increased storage efficiency means fewer carts need to be purchased for larger storage areas, reducing capital purchase cost

**MS8140-DR**
Double column medical storage cart with locking Plexi-glass doors

**MS8140-A**
Double column medical storage cart with tambour door, preconfigured with 2", 4", and 8" modular trays

Plastic Interior Side Panels hold exchange trays and baskets

INTRAOCULAR LENS CARTS

Secure & Expand Sterile Storage of Intraocular Lenses

- Does not count against available square footage.
- Perform more procedures each day by storing lenses in one mobile unit.
- Compatible with multiple brands and sizes of IOL boxes, including Alcon, Bausch & Lomb®, Rayner, and Abbott Medical Optics.
- Designed for storage of intraocular lenses in outpatient surgery centers, these carts are great for many different storage needs in the OR.
- Portable storage for what you need, where you need it. Reduce wasted time by having mobile medical supplies in the OR rather than a distantly located supply closet.
- Painted steel cabinet and drawers
- Contemporary design with rounded corners
- Six pull-out drawer shelves with adjustable dividers - ideal for medical supplies used in surgery centers and operating rooms
- Lockable, secure storage of supplies: Key lock with two keys
- Double doors with plexi-glass inserts open 180 degrees (IOL924); 270 degrees (IOL1260) for full access
- Plexi-glass windows allow for visibility of supplies, while locking doors provide security
- Ball-bearing full extension drawer slides
- Five inch full swivel casters, one with brake, one directional
- Removable plastic top with integrated push handles
- Full wrap-around vinyl padded bumper

**FEATURES & BENEFITS**

**IOL1260**
Capacity of up to 1,260 Lenses

**IOL924**
Capacity of up to 924 Lenses
Harloff’s **Visual Bin Storage Cart** is designed to hold a mixed assortment of storage bins in a secured, portable and visual environment for effective inventory management of clinical supplies. The cart provides flexible storage and transport of sterile medical supplies while helping facilities secure and manage inventory to cut costs, decrease waste, improve productivity and enhance patient care.

It’s unique feature is a louvered panel inside the locking cabinet which holds up to 42 Akro-Mills AkroBins® (bins not included). Use the multiple sizes and colors of these bins to organize supplies in standardized locations that can be delivered to wherever they are needed, increasing workspace efficiency and improving workflow.

**FEATURES & BENEFITS**

- Enclosed and locking cabinet keeps items secure.
- Standard clear front Plexiglas doors allow visual inspection of supplies.
- Built using powder-coated steel for durability and easy to clean surfaces.
- Louvered Back Panel holds multiple sizes of AKROBINS® (bins not included).
- Key locking doors open flush to sides of cabinet for unobstructed access.
- Integrated side push handles.
- Full wrap-around vinyl bumper.
- Five inch (12.7 cm) premium rubber full-swivel ball-bearing casters, (one with brake, one tracking).
- Cart is delivered assembled, with wheels installed.
Transporting bulky and heavy materials within a hospital can expose personnel to risk of injury. In 2008, the average claim for a musculoskeletal disorder in the material handling industry was $24,438. This does not include the additional indirect costs to staff such as overtime or temporary hires, time spent dealing with investigating and managing claims, and increased cost of insurance premiums. OSHA reports the indirect cost of a worker’s compensation claim is 4.5 times the direct cost, or $110,000.

**FEATURES & BENEFITS**
- Spring-suspension extends drive life
- Center wheel drive system gives tight turning radius
- Transaxle drive system with powerful 24 volt motor
- Non-marking, flat-free tires
- User friendly variable speed control offers speed range of 0-3 MPH
- Horn, key switch, emergency stop, forward/reverse switch, LED battery charge indicator
- Two 12 Volt maintenance free batteries with charging system
- Automatic dynamic braking and parking brake
- National network of service providers
- Powder coat paint and rubberized load deck
- Handle Height – 39" Load Deck height 11.5"
- Delivered ready-to-use
- No assembly required
- Ships FOB Wisconsin

**MODELS INCLUDE:**

**HTP4025**

**MEDICAL STORAGE & INVENTORY SOLUTIONS**

**POWERED TRANSPORT CART**

*Avoid Workers Comp Claims*
As an original design manufacturer, Harloff seeks new business opportunities to engineer products and components that others will integrate into their distribution systems and medical devices. Our engineering effort is dedicated to the creative application of scientific principles to design carts, cabinets and components that meet the functional and aesthetic requirements of our customers. Our list of private label clients continues to grow because they profit from the arrangement of selling branded products without the challenge of running a factory.

Choose from any of our durable, long lasting paint finishes. Use this color guide to select the appropriate color for your order. Harloff’s high-capacity powder coating conveyor system uses an electro-statically applied paint that is baked on at 400 degrees Fahrenheit to ensure durability.

Harloff can provide custom colors and finishes to match unique requirements. Please be aware that Harloff requires a color choice on all orders in order to process them for shipment.

NEW! Anti-Microbial Paint Upgrade!

An Antimicrobial paint finish is now available for our medical equipment’s painted surfaces. This upgrade consists of a clear coating that incorporates silver-ion technology, a proven anti-microbial agent. Our paint finish uses the natural protective qualities of silver (Ag) as an active ingredient to inhibit the growth of microbes, using the controlled release of silver ions to provide continuous suppression of microbial growth on the product to which it’s applied. The anti-microbial benefit will be present for the life of the coating, with the longevity and durability varying depending on the specific environment and wear and tear conditions.

Please call Harloff for details.
Harloff manufactures for a worldwide network of buyers.

Harloff sells nationally through leading healthcare distributors and provides local support through a national network of experienced medical sales professionals. Harloff is an experienced provider to the international healthcare market.
