

SOUTHWEST SOLUTIONS GROUP

BETTER STORAGE. BETTER CARE.
BUILT RIGHT IN.

The **Southwest Solutions** patient server is designed to put **80% of the most frequently used supplies** for patient care **10 steps from the bedside.**

This lets you:

- Build a decentralized nurse station right into each patient's room – equipping nurses to spend less time “hunting and gathering” and more time caring for patients.
- Reduce traffic through the patient room by stocking supplies from outside the room – minimizing patient exposure and interruptions.
- Optimize floor plan and patient-room design, yielding more usable space – maximizing cost-per-square foot.
