Overhead Storage Made Easy

With a push of a button your clothes come right to your fingertips.
Removing hangers is easy because they are at eye level, the ideal height.
No more climbing which means no more ladder injuries.
Your things are up and out of the way where they stay fresh and untouched until needed.
Inventory is a breeze because you can see and touch everything in minutes.
The lifts mount into your ceiling, your aisles and floors are open again.
Your existing shelving stays right where it is.
Suddenly your empty overhead space becomes a valuable asset.
Double your storage without a remodel.

Ideal for hanging costumes, clothing, uniforms, large linens, backdrops, drapes, garments and more.

The Over Under Option is best for narrow aisles. This is the usual choice for a retrofit if aisle shelving needs to stay in place.
Overnight you can double your storage space.

The T-bar Option requires more open floor space. This option is favored for long hang garments.
These are also used at truck docks for staging and keeping fresh garments safe and out of the way.

The most ambitious option is the Quad. You get the most bang for your buck when you have the open space to work with. You will want access to both sides of the lift when it is down.

Order the lift that fits best in your space. Available in lengths of 8', 12', 16', 24', 32', 40', 48'.
