Welcome to the World of Phoenix Files and Safes

Ask any Phoenix customer whose documents and data have withstood a fire and the water to put it out. Not all files and safes are created equal, and none rival the protection you’ll get in products from Phoenix Safe International, LLC.

Phoenix distributes a full line of safes and files offering on-site records protection from fire, water and theft. Our products offer superior, independently tested protection to guard your valuables against the worst disasters. And with a variety of sizes, styles, finishes and colors, they cater to most designs and decors.

Phoenix has protected valuables since the 18th century. Originally known as Richmond Manufacturing, the company’s origins were in maritime carpentry for merchant fleets sailing to America from Liverpool, England.

More than 200 years later, we launched Phoenix Safe International as the company’s American arm. We personally

In this catalog, you’ll find a wide range of files and safes — supported by our inventory of nearly 2,000 quick-ship items, rigorously tested to meet the highest standards of protection and attractively designed to appeal to any customer.

As our newest line, World Class files offer our most popular combinations of features, sizes and colors without compromising style or toughness.

Thank you for considering Phoenix Safe International, where protecting your valuables is our burning passion.

Key to the protection labels found throughout this catalog.

Theft Protection
Independently rated to deter theft

Fire Protection
Rigorously tested to protect paper documents from fire

MTC Grade B Rating
Protects certain types of computer media (CDs, DVDs, USBs and memory sticks)

Data Protection
Class 125 protection for all computer media

Questions?

Fire Test Standards
Each Phoenix fire-resistant model is independently tested to European or American standards for fire protection and carries certification labels from the testing agency that identify the product’s fire protection level.

Products for Storage of Paper Records: Products that provide fire protection for paper records are listed in this brochure with the designation of “Class 350.” Tests for products designed to protect paper records range from 60 to 120 minutes in temperatures ranging from 1700°F to 1859°F. By comparison, a typical fire lasts 20 minutes and reaches 800 °F. During the fire test, the internal temperature of the product is monitored to ensure that it does not rise above a level that would endanger the paper documents stored within the product. The designation tag also indicates the length of the fire test as “1 HR, 1 ½ HR, or 2 HR” and is located next to each model number.

Products for Storage of All Computer Media: Products that provide fire protection for all types of computer media are listed in this brochure with the designation of “Class 125.” Tests for products designed to protect computer media range from 60 to 120 minutes in furnace-burn time, at temperatures ranging from 1700°F to 1859°F. By comparison, a typical fire lasts 20 minutes and reaches 800 °F. During the fire test, the internal temperature of the product is monitored to ensure that it does not rise above a level that would endanger the computer media stored within the product. The designation tag also indicates the length of the fire test as “1 HR, 1 ½ HR, or 2 HR” and is located next to each model number.

MTC Grade B Rating
Certain types of computer media (CDs, DVDs, USBs and memory sticks) are less sensitive to heat and humidity than tapes, cartridges or hard drives. These less-sensitive items can be safely stored and protected inside some products designed to protect paper records. Products that carry the MTC Grade B rating have been tested and certified to provide adequate protection for these items. Products that are rated “Class 125” are designed to store and protect all types of computer media and should be used whenever the more sensitive items need protection.

**Note:** The tables provide detailed specifications including model numbers, descriptions, external dimensions, and weight for various products. Each product is classified under different categories such as World Class, Business Class, and Custom Class. The tables also include information on protection standards, media protection, and fire protection for paper documents. The documents can be protected against burglary security ratings and require replacement after fire damage.
Nothing destroys pasts and threatens futures faster than fire.

Nothing protects them better than Phoenix.

Fire is the most common disaster to befall businesses, forcing nearly half of those affected to close forever. Vital records and data also can burn up in minutes, irreplaceable through insurance.

Phoenix fire files save you from that stress — durably built to endure the harshest fires, attractively designed to fit many décors and readily available in the sizes you need.

All Phoenix fire files are tested at temperatures up to 1700°F and keep paper safe from the deadliest fires. Our proprietary insulation is independent to each drawer, protecting closed drawers even if one is left open. Inner steel jackets guard against theft via unlocked compartments and keep insulation out of documents, locking mechanisms and suspensions. And labyrinth sealing systems further defend documents from water used to extinguish fires.

Plus, Phoenix fire files protect digital media — with extra insulation and moisture barriers to guard memory sticks, hard drives, CDs, DVDs and USBs.

Phoenix files are as stylish on the outside as they are sturdy on the inside. Available in lateral or vertical sizes, their modern design assures a perfect fit for your home or office.

You can’t predict fire, but you can plan for it. With Phoenix fire files, you’re guaranteed to preserve your past and your future.
## INTRODUCING WORLD CLASS PROTECTION

Meet the future of fire and water protection with World Class files from Phoenix.

True to its name, the World Class line blends the best of all Phoenix has to offer — rugged endurance to withstand the toughest disasters, eye-catching styles that fit in anywhere and the features you need to personalize your protection.

World Class files are built to the specifications you want, available in legal, letter and lateral size models.

And of course, World Class files stand up to the harshest fires and the water that puts them out. Each file is rated to protect your documents from intense fires, while a labyrinth sealing system and special gaskets prevent water damage from sprinklers and fire hoses.

The features you want. The style you prefer. The toughness you expect.

Welcome to World Class fire protection from Phoenix.

### Lateral Files

Combining powerful protection and aesthetic polish, World Class lateral files cater to heavy-duty storage needs. Each drawer is equipped to handle legal- or letter-sized folders from front to back or side to side. Drawers also use a three-way suspension for stability and feature an anti-tip safety mechanism that prevents more than one drawer to open at a time.

See pg 23
Phoenix World Class and Business Class fire files work from the inside out to safeguard your records. Here are some of the individual parts that add up to unparalleled protection for your paper documents and digital media (CDs, DVDs, USBs and memory sticks) from fire, water and theft:

1. Solid, one-piece steel construction of the outer body provides superb durability
2. High-sided drawers and adjustable rails allow hanging-folder filing
3. Movable dividers accommodate standard folder filing in vertical files
4. Key-operated plunger lock ensures privacy
5. Proprietary Styronite insulation ensures a world-recognized certification of Class 350 – 1-hour fire protection from Europe’s prestigious SP Institute; files are also explosion- and impact-resistant
6. Independently insulated drawers protect closed compartments if one is left open during a fire
7. Inner steel jackets prevent access from unlocked compartments and insulation from touching your documents
8. Labyrinth sealing system and special gaskets prevent water damage from fire-hose spray or sprinklers
9. Lock-bypass mechanism allows selected drawers to remain unlocked, even when the file is locked

Business Class fire files protect your valuable documents and personal belongings from devastating, destructive fires and the water used to extinguish them.

Business Class files combine top-flight protection, design and durability — tough enough to withstand fire for one hour, sleek enough to fit your modern décor needs and secure enough to keep your documents private and safe. Available with plunger key lock, dial combination lock or electronic lock.

Series Features for World Class and Business Class:

- Two- and four-drawer vertical models: One-drawer model offered in business class; two-, three- and four-drawer lateral models.
- Durable textured paint finish in either black or putty
- Recessed drawer pulls
- Selective, key-operated plunger lock for security in all drawers
- Lock any number of drawers and leave the rest unlocked for customizable privacy
- Independent drawer insulation protects closed drawers if one is left open during a fire
- Inner steel jackets cover insulation and block access via unlocked compartments
- Impact-resistant for 30-foot drops
- Class 330 – 1-hour fire resistant
- MTC Grade B rating protects CDs, DVDs, USBs and memory sticks
- Resists explosions of up to 2000 °F
- Labyrinth sealing system and special gaskets prevent water damage
- Optional electronic or combination locks are available for Business Class files
CUSTOM CLASS FILES

STANDARD FEATURES

If you’re looking for all the right features and room to customize, Custom Class files are a perfect choice.

Vertical Features:
- Two, three and four drawers available in legal- and letter-sized widths in 31”D models. Two and four drawers available in 25”D models.
- Perfect protection for paper, with the UL Class 350 — 1-hour fire-resistant rating.
- Rated to resist explosions of up to 2000 °F.
- Design guards against water damage from fire hoses and sprinklers.
- Gang lock, selective locking system, key lock for privacy, and follower blocks.
- Steel-lined drawers keep insulation out of sight.

Lateral Features:
- Available in two-, three- and four-drawer 38”W and 44”W models that accommodate legal- and letter-size files.
- INTERLOCK system allows only one open drawer at a time to prevent tipping.
- Three-arm SwayGard suspension system minimizes torque.
- One-hour fire-resistant rating and protection against explosions up to 2000 °F.
- Design guards against water damage from fire hoses and sprinklers.
- Gang lock, selective locking system and key lock for privacy.
- Steel-lined drawers keep insulation out of sight.
- Integral rails for left-to-right filing of hanging legal documents; optional rail for hanging letter documents also available as an accessory.
- Cross rails for front-to-back filing of legal- or letter-size documents included.

OPTIONAL ACCESSORIES

Custom Class vertical and lateral fire files are available with a full range of optional accessories for increased efficiency, including:

- **Interior cross trays**
  - Permits the filing of checks and cards of various dimensions. Trays can easily be removed and carried to your work area and replaced in file drawer later.

- **Drawer-in-a-drawer**
  - Factory-installed, doubles drawer capacity when filing card files or checks. Each drawer section opens independently for easy access.

- **Special lock options**
  - Includes dial combination locks, electronic combination locks and additional key locks. Call to learn more about our locking options.

- **Row inserts**
  - Installed in drawers to keep checks or card files neatly organized and easy to access.

Phoenix safes protect your documents and peace of mind.

Talk about a perfect combination.

Phoenix safes let you enjoy unrivaled safety and security in any location. Lock a laptop in a dorm. Protect personal documents in a den. Take precautions for cash at a business. Whether you’re guarding money, records, electronics or data, we’ve got the safe for you.

Our Fire Safes shield belongings from the hottest fires for up to two hours. In our Cashier Deposit Safes, solid steel provides immediate security to safeguard goods and money.

Double-door construction and water-resistant seals on our DataCare Safes are specially built to protect media and data. And our FSB (Fire and security protection) Safes come standard with eight reinforced bolts and heavy-duty doors to resist external attacks.

Many of our models feature easily programmable, user-friendly digital electronic locks. And biometric fingerprint locks are available for our FSB line, offering the ultimate in state-of-the-art safekeeping.

No matter what type of thief is trying to do its worst, a Phoenix safe is always at its best.
DATA PROTECTION

MEDIA SAFES

Phoenix DataCare Safes are specifically designed for unrivaled data defense with first-class protection against fire and water damage, as well as superb security and privacy options.

DataCare 2000 Series

Geared toward small- and medium-business or domestic use, the DataCare 2000 Series offers certified protection for all media types, including removable hard drives.

DataCare 2000 Series Features:
- Available in four convenient sizes
- Certified protection for all media types, including CDs, 8mm and 4mm cartridges, digital linear tape (DLT), linear tape-open (LTO), and removable hard drives
- Impact-resistant for 30-foot drops
- Construction protects contents from magnetic interference
- Double-door construction with internal seals prevent water damage from fire hoses and sprinklers
- Pick-resistant, seven-pin, dimple-key locks offer privacy and extra security
- Available in three convenient sizes
- Certified protection for all media types, including CDs, 8mm and 4mm cartridges, digital linear tape (DLT), linear tape-open (LTO), and removable hard drives
- Two-hour Class 125 fire protection at temperatures exceeding 1800 °F
- Double-door construction with internal seals prevent water damage from fire hoses and sprinklers
- Construction protects contents from magnetic interference
- Program your own code with user-friendly digital electronic locks
- Easily adjustable shelves and pull-out drawers for multimedia storage

Data Commander 4620 Series

With digital locks and adjustable storage, the Data Commander 4620 Series takes charge for businesses with extensive data-protection needs.

Data Commander 4620 Series Features:
- Available in three convenient sizes
- Certified protection for all media types, including CDs, 8mm and 4mm cartridges, digital linear tape (DLT), linear tape-open (LTO), and removable hard drives
- Construction protects contents from magnetic interference
- Program your own code with user-friendly digital electronic locks
- Easily adjustable shelves and pull-out drawers for multimedia storage

- Other accessories are available.

Series Features:
- All safes feature construction with internal seals that prevent water damage from fire hoses and sprinklers
- Protection of up to 60 minutes for CDs, DVDs, USBs and memory sticks
- Fire Fighter 507 and 509 can accommodate banker’s box storage
- Impact-resistant for 30-foot drops

Optional Accessories:
- Pull-out Shelves and File Hangers provide easy access to important records in the 507/509 models
- Pull-out File Hanger
CASHIER DEPOSIT SAFES

Phoenix depository safes protect goods and money where immediate security is needed without unlocking the safe or requiring a cashier to hold keys.

990 Series Features:

Front-Loading 990 Series Models

Front-loading models use a tilting baffle plate to ensure contents are not “fished out.”

*Height, weight and depth measured in inches.

Front-loading models 991, 991E, 991TE, 992, and 992E are fitted with a special Phoenix tilting baffle plate to ensure that the contents cannot be “fished out.”

Models 992 and 992E have separate lockable deposit chamber inside.

Models 991, 991T, 992, 994 and 994T are available with a dial combination lock.

Churches, concession stands, ticket offices and fundraiser collection sites have all relied on Phoenix depository safes to protect collected cash until deposited at the bank.

The 990 Series bodies are constructed with a ¼” steel plate, with a ½” door of solid steel that is further reinforced with hardened anti-drill plates over the locking area.

Large-capacity drop area can accommodate money bags, envelopes, packages and deposit capsules.

Top-Loading 990 Series Models

Top-loading models use a rotating drum to seal the safe completely after deposits.

*Height, weight and depth measured in inches.

All deposit safes are predrilled for bolting to the floor.

Model 995 is available with a dial combination lock on the top compartment and a high-security key lock on the bottom compartment.

The top loading rotary models 994, 994E, 994T, 994TE, 995 and 995E have a rotating drum that completely seals the safe after the goods or cash have been deposited.

Models 991E, 991TE, 992E, 994E, 994TE and 995E feature electronic combination locks (pictured below).

Optional Electronic Lock

www.southwestsolutions.com
www.southwestsolutions.com
Lock Features
- Accepts up to 100 different fingerprints
- Simple optical sensor system used to register user fingerprints
- Dust cover protects lock while not in use
- Digital combination included in lock, which can be used in place of fingerprint system if desired
- Worldwide security classification

Convenience, Security, Innovation.

The Phoenix Biometric Fingerprint Lock

The Phoenix biometric lock is personalized to the user’s fingerprint and doesn’t require metal keys or combinations to open. This makes it one of the most convenient, reliable and personal locks available.

FSB SAFES

The Phoenix Biometric Fingerprint Lock

- Height, width and depth measured in inches.

Imperial 980 Series

Large enough to store laptop computers, these combination-lock safes are perfect for multiple users. With an easy-to-change combination, the Imperial Series is perfect for locations such as dormitories, hospitals, assisted-living homes and other facilities where occupants change often.

Model 986D is programmable to read credit cards or other magnetic-strip cards for combinations. The touchpad can also be used alone or in conjunction with the strip-card lock. An override key also is included.

DATACARE MEDIA INSERTS

Vulnerable to excess heat and moisture, your computer media needs additional protection even when stored in an insulated file or safe, where the internal temperature can reach as high as 350°F and humidity levels can reach 100%.

- Certified protection for all media types, including removable hard drives
- DataCare Media Inserts are designed to work with any Class 350-rated insulated file or safe to provide an environment that will keep your data protected
- Extra insulation and special moisture barriers keep the inserts’ internal temperature below 125°F and the humidity level below 80% during the 1700°F - 1-hour fire test
- Inserts are available in several capacities
- Lockable drawers reduce usable internal height by 2 1/4”
- Height, width and depth measured in inches

MULTI-USER SAFES

These convenient, rugged safes are designed for dorm rooms, assisted-living apartments and other commercial or domestic uses.
