An innovative weapon calls for an innovative storage solution.

Spacesaver is pleased to offer a special bracket, specifically designed for storing the Taser X26 electronic control weapon in our Universal Weapons Rack.
Weapons storage has just been revolutionized with Spacesaver Corporation’s new Universal Weapons Racks. Space-efficient, cost-effective, and versatile. Now available on GSA Contract. Setting up an armory has never been this easy.

- Durability - Fully welded, heavy gauge cabinet provides long lasting use even under the toughest conditions.
- Flexibility - “A la Carte” configurability accommodates the storage of a wide variety of weapon types (long and hand guns), gear, optics and spare barrels.
- Security - Retractable doors and locking bars provide weapon security of conventional arms, ammunitions and explosives (OPNAVINST 5530.13B).
- Bin System - The Bin System is designed to store gear, optics and special equipment inside the cabinet.
- Space Efficiency - Modular, stackable design maximizes armory storage space. Cabinets may be ganged together and placed on high-density mobile systems.
- The Universal Weapons Rack accommodates a wide variety of weapons.

Spacesaver Storage Systems

Diamond shaped mesh permits visible counts of weapon inventory.

Cabinets and interior accessories are totally reconfigurable.
