# A higher level of security for controlled pharmaceuticals

With the DL-100 and DL-200 Drug Lockers, you can be assured your customers prescriptions will remain safe and secure.

With an outer case made of heavy-duty 16-gauge steel, and 14-gauge doors resting on a full-length hinge with 3-point locking, the DL's offer a formidable defense barrier against unauthorized access.

## Two Configurations Available

DL-100: 24" wide, single door, 3-pull out shelves; one file drawer

DL-200: 48" wide, double door, 7-pull out shelves including one for oversized storage, and one file drawer

Authorized entry first requires the opening of a mechanical managers key lock. Once open, access is granted only after the correct digital code is entered into the electronic lock. With every entry, an audit stamp is recorded by the lock with user information, date and time of entry. Every transactions via the electronic lock will be recorded, enabling a digital trail that is irrefutable.

So when a secure storage unit that utilizes both a mechanical and electronic locking mechanism is desired, housed in a heavy-duty constructed cabinet, look no further than the Korden Drug Lockers.

# Drug Storage Locker Specifications

## Construction:
